## Why I Love Web Design

Web Design is so awesome! I can design pages for people and use my artistic abilities and computer skills and instantly create something that anyone in the world can see! My first love is **Graphic Design**. I love how a good layout can lead to an eye catching creation that communicate an organization’s message. My second love is technology. It’s constantly change, it’s constantly evolving which forces me to be constantly learning new things. For me Web Design is the perfect marriage between both loves! I am constantly adding to my portfolio of design and learning how to create web pages that people want to visit. Web design is my way of continuing learning how to take art off the page and put it on the web for the world.
